Testing URLs

Case 1: Local Development Environment

http://localhost/PATH

Check your local server settings for possible deviations (e.g. default port)

Case 2: Virtual Development Environment

http://IP-OF-VM/PATH

Use IP of your virtual machine or map URL to IP in your hosts file and then use this URL

Case 3: CloudDevelopment Environment

http://CLOUD-URL/PATH

Use testing URL as provided by your cloud development service
